MEDIVO

SMART MEDICATION MANAGEMENT SYSTEM

User Manual

Welcome to Medivo

Thank you for trusting and choosing Medivo. This manual explains how to set up, use, maintain, and safely store your Medivo smart medication management system.

Please read this manual before using Medivo for the first time.

1. About Medivo

Medivo is a smart medication management system designed to help users organise scheduled medication and receive timely reminders. It combines a physical medication-dispensing unit with a digital interface for entering prescription and schedule information.

- Helps organise medication according to a planned schedule.
- Provides reminders when medication is due.
- Allows prescription and medication schedules to be managed through the connected digital interface.
- Supports caregiver monitoring of medication adherence information.
- Includes additional storage for medicines such as syrups or inhalers, where provided.
- Includes a separate emergency-medicine compartment, where provided.

Important

Medivo can help with medication organisation and reminders, but it does not replace a doctor, pharmacist, caregiver, or prescribed medical instructions.

2. What's Included

- Medication compartments / trays
- Control buttons and display
- Reminder buzzer and indicator lights
- Digital application / web interface access
- Emergency medicine compartment
- Detachable lower storage

3. Getting Started

3.1 Powering the Device

- Before first use, make sure the built-in rechargeable battery has sufficient charge.
- Charge the device using the designated charging method provided for your Medivo unit.
- Allow the device to charge sufficiently before using it for the first time.
- Do not use the device if the battery or device casing appears swollen, damaged, or unusually hot.
- Disconnect the device from charging once it is sufficiently charged.

3.2 Turn on Medivo

- Switch on the device using the power switch.
- Wait for the display to initialise.
- Confirm that the display and indicator lights respond normally.

3.3 Connect / Open the Digital Interface

- Open the Medivo digital interface using the access method provided with your unit.
- Enter the required user/patient information and medication details.
- Save the medication schedule before loading medicines into the device.

4. Setting Up a Medication Schedule

For each medication, enter the information required by the Medivo interface, such as:

- Name of the patient
- Personal details of the patient (age/blood group)
- Medication name
- Dosage / quantity, as prescribed
- Time or times the medication should be taken
- Relevant schedule or frequency
- Any additional notes required for safe use

Medication safety

Always enter medication information according to the prescription or instructions provided by a qualified healthcare professional. Do not change a prescribed dose or schedule through Medivo unless instructed to do so.

5. Loading Medication

Load medication only after the schedule has been checked.

1. Wash and dry your hands before handling medication.
2. Open the relevant medication compartment.
3. Place the correct medication and quantity in the compartment assigned to that scheduled dose.
4. Check the medication name, quantity, and scheduled time again before closing the compartment.
5. Close the compartment securely.
6. Repeat the process for the remaining scheduled doses.

Do not mix medicines unless instructed

Keep medicines separated according to the prescription and the Medivo schedule. Medicines that require special storage conditions, refrigeration, liquid handling, or other specific requirements should not be placed in a compartment unless the product instructions and Medivo configuration specifically allow it.

6. Taking Medication

When a scheduled medication time is reached:

7. Medivo provides the configured reminder using its display, alarm and indicator light.
8. Check the displayed reminder and identify the medication due.
9. Access the authorised compartment as instructed by the device.
10. Take the medication according to the prescription.
11. Close the compartment after use.
12. If your Medivo interface provides an acknowledgement option, record the dose as instructed.

Important limitation

A reminder, compartment opening, or digital acknowledgement does not by itself prove that a medication was swallowed or otherwise taken. Medivo is intended to support adherence, not to provide clinical confirmation of ingestion.

7. Additional Storage Areas

Detachable Lower Storage

The detachable lower storage area can be used for suitable additional medication items, such as syrups or inhalers, where the supplied Medivo configuration supports them. Keep such medicines in their original containers when appropriate and follow their storage instructions.

Emergency Medicine Compartment

The separate emergency-medicine compartment is intended for medicines that need to be kept separately from regular scheduled doses. Only store medicines there that are appropriate for the compartment and as directed by a healthcare professional.

8. Using the Digital Interface

The digital interface is intended to support medication scheduling and monitoring.

- Add or update patient information as required.
- Enter prescribed medication details.
- Set the relevant medication schedule.
- Review upcoming scheduled doses.
- Review available adherence / reminder records.
- Update information whenever a prescription is formally changed.

Before changing a schedule

Verify any prescription change with the prescribing healthcare professional. Medivo should reflect the prescribed plan; it should not be used to independently decide medication changes.

9. Cleaning & Maintenance

- Switch off and disconnect the device from power before cleaning.
- Wipe the exterior with a soft, slightly damp cloth.
- Keep electronic components, buttons, display openings, and charging ports dry.
- Do not immerse Medivo in water.
- Do not pour cleaning liquid directly onto the device.
- Keep medication compartments clean, dry, and free from loose residue.
- Inspect the casing, buttons, cable, and compartments regularly for damage.

- If a component is damaged, stop using the affected function and contact the responsible Medivo support team.

10. Safety Instructions

- Keep medicines out of reach of children and unauthorised persons.
- Do not use Medivo as a substitute for professional medical advice.
- Never intentionally exceed the prescribed dosage.
- Do not use damaged, leaking, overheated, or visibly defective equipment.
- Keep the device away from excessive heat, moisture, and direct contact with liquids.
- Do not open or modify the electronic components unless authorised by Medivo technical personnel.
- Keep medicines in their original labelled containers whenever practical and follow their individual storage requirements.
- Check expiry dates and medication condition regularly.

11. Troubleshooting

Problem	Possible cause	What to do
Device does not turn on	Low battery / power issue	Charge or connect the device using the supplied power equipment and try again.
No reminder sound	Reminder setting or buzzer issue	Check the configured schedule and reminder settings. If the problem continues, contact support.
Display is not responding	Power or system issue	Restart the device. If the problem continues, stop use and contact support.
Medication schedule is incorrect	Schedule was entered incorrectly or prescription changed	Check the entered information against the current prescription and correct it.
Compartment cannot be accessed	Authorisation / mechanical issue	Do not force the compartment. Follow the authorised access procedure and contact support if necessary.
Device becomes unusually hot	Possible electrical or battery fault	Disconnect power, stop using the device, and contact support.

12. Storage

- Store Medivo in a clean, dry place when not in use.
- Keep the device away from extreme temperatures and excessive humidity.
- Remove medication and store it according to the medicine's own storage requirements if the device will not be used for an extended period.

13. Quick Start Checklist

- Charge / power Medivo
- Turn on the device
- Open the digital interface
- Enter patient and medication details
- Set the prescribed schedule
- Load each medication into the correct compartment
- Check the schedule and compartment contents
- Keep Medivo in a safe, dry location

14. Support & Product Information

For product support, technical assistance, or questions about your specific Medivo unit, use the official Medivo contact details provided with your purchase.

15. Disclaimer

Medivo is a medication-management and reminder device. It is not a medical device intended to diagnose, treat, cure, or prevent disease, and it does not replace professional medical advice, a prescription, or supervision by a qualified healthcare professional. Users and caregivers remain responsible for confirming the correct medication, dosage, timing, and storage requirements. Medivo's reminders, access records, and acknowledgements should not be interpreted as proof that medication was actually taken. Always follow the instructions provided by your doctor or pharmacist.
